

Shreya Prakash

Research Interests: Causal Inference, Fairness, Sensitivity Analysis

shreyap1@uw.edu

<https://shreyap18.github.io/>

EDUCATION

University of Washington

2020 - 2025

PhD in Statistics, Advanced Data Science Track. (*Advisors: Elena Erosheva and Carlos Cinelli*)

Carnegie Mellon University

2016 - 2019

B.S in Statistics and Machine Learning, University Honors

RESEARCH EXPERIENCE

University of Washington

Dissertation Research (advised by Carlos Cinelli and Elena Erosheva)

2021 - Present

- Quantifying discrimination in NIH Peer Review using causal decomposition methods
- Developing interpretable sensitivity analysis tools to assess the robustness of our causal claims
- Studying finite sample performance for causal structure learning

Research Assistant in WA Notify project

2021

- Conducted research on the impact of the privacy-protected exposure notification app (WA Notify) on COVID-19 transmission and identified factors influencing willingness to quarantine and get tested using statistical methods

Carnegie Mellon University

Undergraduate Research Assistant advised by Alexandra Chouldechova

2019

- Assessed the presence of age, race, or gender-based discrimination in the utilization of fully or semi-automated decision-making processes for determining when a case worker should investigate specific abuse cases

Undergraduate Research Assistant advised by Peter Freeman

2019

- Developed a data pipeline to aid astronomers in understanding the evolution of galaxies based on their current appearances, employing techniques to address imbalanced data

Undergraduate Research Intern in Black & Veatch Corporate Capstone Project

2018 - 2019

- Created an R Shiny app for analyzing historical company data, predicting injury and property damage cases, and generating prevention strategies through partial dependence plots (pdp).

Undergraduate Research Intern for the KONAM Foundation

2017

- Designed and implemented a machine learning algorithm that assesses the risk of planting certain crops for marginalized farmers in India

PUBLICATIONS, TALKS, & MEDIA

1. **S. Prakash**, C. Cinelli, E. Erosheva, C. Lee, "A Causal Decomposition Analysis of Black-White Disparity in Selection into Discussion during NIH Proposal Review Process", (2024), (in preparation)
2. **S. Prakash**, F. Xia, E. Erosheva, "Towards Causal Discovery with Statistical Guarantees", (2024), (in preparation), Presented at The Western North American Region of The International Biometric Society 2023
3. **S. Prakash**, et al., "Characterizing Incidents at Black & Veatch", *Carnegie Mellon University Meeting of the Minds Undergraduate Research Symposium*, (2019), (3rd Place winner in Poster Presentation Competition)
4. **S. Prakash**, P. Freeman, "Linking Galaxies Across Time via Conditional Density Estimation", *Carnegie Mellon University Meeting of the Minds Undergraduate Research Symposium*, (2019).
5. S. Konam, **S. Prakash**, et al., "New App for Indigenous Farmers", *The Hans India*, (2017), [Link](#).

PROFESSIONAL EXPERIENCE

- Data Scientist, *Marinus Analytics*** 2020 - 2021
- Applied machine learning and time series analysis for unstructured child welfare case records
 - Launched spam filter and underage person detection algorithms for TraffickJam: an application that uses human trafficking advertisement data to aid law enforcement with finding trafficking victims and traffickers
 - Productionalized Infoshield: a text clustering algorithm for large scale human trafficking advertisement datasets.
- Data Science and Research Intern, *84.51°*** 2019
- Fixed issues and tested optimization algorithms for grocery promotion; recommended running promotion optimization for 52 weeks to increase category performance by 4%
- Software Developer Intern, *Optum Technologies*** 2018
- Built authentication, UI and containerized existing application for cloud deployment, generating millions in savings and revenue
- Research Intern, *Royal Caliber D3M Program DARPA*** 2017
- Worked on machine learning on graph datasets and implemented a significantly more efficient way to estimate the number of triangles in a graph, (from $O(V^3)$ to $O(V)$, where V is the number of graph vertices), using a wedge sampling algorithm

SKILLS

Programming: Proficient in R, Python, SQL. Familiar with C, Standard ML, Matlab, Java, Bash, Mathematica

Libraries/Software: numpy, pandas, scipy, sklearn, statsmodels, tensorflow, seaborn, matplotlib, rjags, tidyverse, parallel, Git, Docker, AWS S3 & EC2, Keras

TEACHING EXPERIENCE

- Teaching Assistant, *University of Washington*** 2021 - Present
- Spring 2023: Quantitative Introductory Statistics for Data Science (STAT 391)
 - Winter 2023: Elements of Statistical Methods (STAT 311)
 - Autumn 2022: Statistical Reasoning (STAT 220)
 - Spring 2022: Causal Modeling (STAT 566)
 - Winter 2021: Statistical Concepts and Methods for the Social Sciences (STAT 221)
- Teaching Assistant, *Carnegie Mellon University*** 2017 - 2019
- Fall 2019: Introduction to Probability Theory (36-225)
 - Spring 2019: Introduction to Machine Learning (10-601)
 - Fall 2017 & 2018: Methods for Statistics and Data Science (36-202)

RELEVANT COURSEWORK

- Statistical Learning
- Causal Modeling
- Statistical Graphics and Visualization
- Advanced Theory for Statistical Inference
- Foundations of Fairness in Machine Learning
- Parallel and Sequential Data Structures and Algorithms (C/SML)
- Foundations of Machine Learning
- Causal Inference: Identifiability and Estimation
- Linear Algebra
- Advanced Regression Methods
- Probability Theory
